

Explanatory Note

First Step

The Site bounded by buildings on three sides. Which have rectangular shapes and defines a big rectangular shape on the site. Their trace gived us the constraints for our design.

Green Area

There are many tress in the area and they have been there for a long time. So we try to protect their presence as much as we can do. But the brief pushes us to remove some of them. We removed by considering their damages.

Platfrom

To protect it's own landscape the we've designed 2 courtyard for Karin Dom which located in the building (inner courtyard) and on the 1st floor as a children playground areas.
