

According to the typical construction per square meter data in Bulgaria, the building costs will be divided in the following; Approximately €356,250.00 euros for the 750m² underground level, €1,021,250.00 euros for the 2,150m² above-ground levels and €135,000.00 euros for the 450m² landscape. This leads to a total investment of €1,512,500.00 euros. In closer inspection and budgeting we can cut costs by optimizing pre-fabricated elements.
